Protein Bioactivity Assay

Recombinant Human EGF Protein (rp145392)-Protein Bioactivity Measured in a cell proliferation assay using BALB/3T3 mouse embryo fibroblasts cell line. The ED50 for this effect is typically <0.9ng/mL.

Recombinant Human IGF-1 Protein (rp147252)-Protein Bioactivity Measured in a cell proliferation assay using MCF7 breast cancer cell line. The ED50 for this effect is typically <4.6ng/mL.

Recombinant Human FGF1 Protein (rp145907)-Protein Bioactivity Measured in a cell proliferation assay using BALB/3T3 mouse embryo fibroblasts cell line in the presence of heparin. The ED50 for this effect is typically <0.5ng/mL.

Aladdin® strictly controls the endotoxin level in recombinant protein products to ensure the provision of safer, more effective, more stable, high-quality recombinant protein with lower immunogenicity for a wide range of medical and biopharmaceutical applications.
